Geriatrics for Rehab Residents CCSE Orientation

2007

- Goal: Provide feedback on strengths and weaknesses of geriatric clinical skills

- Request participation in study . . .
  - Review schedule
  - 15 minutes for focused history and physical (READ directions!!). No pelvic, breast, genitalia, rectal, or corneal reflex exam allowed!
  - Signal knock at door at 10 minutes and again at 15 minutes—must finish up where you are and exit the room
  - You may NOT reenter the room once you exit
  - Post-encounter, will be asked to go to another room and fill out a survey
  - DO NOT DISCUSS CASE—now or later

- SP will not break character—you cannot request a “time out”

- SP will be evaluating you today on your skills as a clinician based on a set of performance markers

- A sticker system will be used to track results—MUST give a sticker to SP and faculty (if present) in each case

- Need a stethoscope and a watch with a second hand; all other materials provided

- You may not bring reference material with you into the testing area. This includes manuals, books, cards, PDAs, etc.

- No cellphones

- No debriefing; rather, you will complete an exit survey at the end of the session

- In 8 weeks you will receive an individualized report card summarizing your results as compared to your peers
