RISKS FOR HAZARDS OF HOSPITALIZATION*

- Isolation
- Polypharmacy
- Unfamiliar Environment
- Malnutrition/N.P.O.
- Immobility
- Sensory Deprivation
- Incontinence
- Insomnia
- Restraints
- Infection
- Depression
- Delirium
- Deconditioning
- Ulcers
- Falls
- Immobility
- Incontinence
ASSESS FOR HAZARDS OF HOSPITALIZATION

TRANSPORT URINARY INCONTINENCE

DIAPERS* = Delirium, Infection, Atrophic vaginitis, Pharmaceuticals, Excess excretion, Restricted mobility, Stool impaction

DELIRIUM
Confusion Assessment Method
Acute onset, fluctuating course & inattention
AND EITHER:
- disorganized thinking OR
- altered level of consciousness

Etiologies: CONFUSED
CNS, Organ dysfunction, Nutritional, Fever, Fluids or electrolytes, Urinary infection or retention, Sensory impairment or overload, Endocrine, Drugs and drug withdrawal

COMPROSED FUNCTIONAL STATUS
Determine if your patient is dependant:

ADLs
Bathing
Dressing
Toileting
Transfers
Continence
Feeding

IADLs
Using the phone
Shopping
Food preparation
Housekeeping
Laundry
Transportation
Taking medicine
Managing money
